Aluminum / Copper / Steel derivatives

AWB _____ Part number _____ Description _____

1) Does the product contain Aluminum? No _____ / Yes _____ (go to question 4)
2) Does the product contain Steel? No _____ / Yes _____ (go to question 5)
3) Does the product contain Copper? No _____ / Yes _____ (go to question 6)

**** If none of the above what is the composition _____**

Aluminum

4) Full weight of the product _____kg Aluminum derivative weight _____kg

Value of the product _____ Value of the Aluminum derivative _____

Country of Smelt _____ Secondary Country of Smelt _____ Country of Cast _____

Primary Smelt- *Country where the product was most recently cast applies to the country where the aluminum (with or without alloying elements) was last liquified by heat and cast into a solid state. The final solid state can take the form of either a semi-finished product (slab, billets or ingots) or a finished aluminum product.

Secondary Smelt- *The country where the largest volume of primary aluminum used in the manufacture of the product was smelted applies to the country where the largest volume of new aluminum metal is produced from alumina (or aluminum oxide) by the electrolytic Hall-Héroult process. Secondary aluminum is defined as aluminum metal that is produced from recycled aluminum scrap through a re-melting process.

Cast- *The country where the second largest volume of primary aluminum used in the manufacture of the product was smelted applies to the country where the second largest volume of new aluminum metal is produced from alumina (or aluminum oxide) by the electrolytic Hall-Héroult process. Secondary aluminum is defined as aluminum metal that is produced from recycled aluminum scrap through a re-melting process.

**** If the Country of smelt/cast information is Russia or Unknown the entry will be processed with 200% additional duty based on the value of the shipment.**

Copper

5) Full weight of the product _____kg Copper derivative weight _____kg

Value of the product _____ Value of the Copper derivative _____

**** If the amount of copper is not known or not provided, the additional duty rate of 50% will be applied.**

Steel

6) Full weight of the product _____kg Steel derivative weight _____kg

Value of the product _____ Value of the Steel derivative _____

Steel Melt/Pour country _____

The Steel new rule Melt/Pour defines "melted country and poured" ✓ as "the original location where the raw steel is: (A) First produced in a steel-making furnace in a liquid state; and then (B) Poured into its first solid shape... The first solid state can take the form of either a semi-finished product (slab, billets or ingots) or a finished steel mill product.

Manufacture Name _____

Address _____
